THE FACTS

- Cardiovascular health is a major challenge. The cardiovascular system sustains life by providing nutrients and oxygen to all tissues, and its proper function is essential for survival. This includes maintaining normal levels of blood cholesterol, a vital component of cell membranes. Triglycerides from fat tissue and blood glucose provide fuel for energy, and the cardiovascular system transports these. Blood pressure within a certain range allows for proper functioning of the system vessels, heart and other organs and this is also regulated by the heart and cardiovascular network.
- Kenzen Bergisterol can help maintain levels of triglycerides, blood glucose, blood pressure and cholesterol that are within normal limits.*
- Bergisterol is an all-natural means of cardiovascular support. It is a juice extract made from a citrus fruit, the bergamot, which has a very high amount of natural plant sterols. Bergisterol is a blend of bergamot and other citrus, the blood orange and clementine, formulated to provide an optimum combination that is also low in calories and high in vitamin C.
- The only type of bergamot used to produce Kenzen Bergisterol is the variety *Citrus bergamia* Risso, a strain that grows in the Calabria region of Italy. Approximately 80% of *C. bergamia* Risso derives from a single area, on the coast of the Ionian Sea.
- Other bergamot products are made from *Citrus aurantium*, a bergamot that contains synephrine and other substances that may affect heart rhythms and arterial pressure. There are also bergamot supplements in capsules, which in independent laboratory testing show results that are far less than those offered by the bergamot extract in Kenzen Bergisterol.
- The bergamot destined for Kenzen Bergisterol is produced without the use of pesticides, harvested and then blended under strict process controls. The final product is stabilized to help maintain freshness and potency, but no artificial preservatives are added.
- Because it is produced from natural ingredients, Bergisterol may be enjoyed without concerns regarding side effects or toxicity.
- As a natural substance, plant sterols are present in some vegetables, but consuming regular servings of this compound from food alone might require a considerable increase in caloric intake. Kenzen Bergisterol is a practical alternative. It can be served alone or mixed with orange or grapefruit juice.

32 oz/946 mL	
HOW TO USE	
1 oz. Refrigerate after opening. Good for 30 days after opening. Serve chilled.	

QUICK SHARING TIPS

Kenzen Bergisterol is blended for a naturally sweet and tart taste, but it can be mixed with other cold beverages for a refreshing change. Try Bergisterol in a glass of orange or grapefruit juice.
