

# CM COMPLEX CREAM

## QUICK REFERENCE SHEET

- *Proprietary formula with new, higher concentration of cetyl myristoleate*
- *Topical application, can be used whenever necessary*
- *Improved formula enhances soothing effect*
- *Includes ingredients with natural cooling properties*
- *Fast-acting*

**Also available in sample/travel size with card**

### CM COMPLEX CREAM FEATURES/BENEFITS:

- **Proprietary formula** . . . . . Maximum percentage of cetyl myristoleate.
- **Superior bioavailability** . . . . . Naturally-sourced compounds, easily absorbed.
- **Light, fresh smell, non-greasy** . . . . . Undetectable when applied.
- **Improved formulation** . . . . . Natural ingredients, provides faster action for relief.
- **Includes aloe, menthol and peppermint** . . . . . Compounds known for soothing and cooling.
- **Immediate results** . . . . . Rapid surface activity on skin.
- **Tube or sample size** . . . . . For personal use or as samples.

# CM COMPLEX CREAM

## QUICK REFERENCE SHEET

### THE FACTS

- Large numbers of Americans are staying physically active and athletic into their older years, much more so than previous generations. The need for a product that addresses this increased activity is rising, and an approach that is non-invasive, easy to use and convenient is especially in demand.
- Cetyl myristoleate possesses natural surfactant and lubricant properties. This is a naturally-occurring compound. CM Complex Cream is a highly purified, refined formula produced from this source material.
- In addition to cetyl myristoleate this formulation includes aloe, menthol and peppermint. All are known to provide natural cooling and soothing effects, with rapid onset of activity for immediate results. Menthol also has an antipruritic function (reduces itching). As plant-derived materials, these compounds offer a natural alternative to synthetic chemical preparations.
- The revised formulation has a pleasant, greaseless feel, without strong odor or staining on application.
- The 4-ounce tube provides a generous supply of the cream. Tubes are available in a 3-pack. The sample size features 15 individual packets, with product cards that can be attached to each sample.

**REAL DIEHL**

CM Complex is endorsed by the estate of Harry W. Diehl, the National Institutes of Health researcher who developed cetyl myristoleate.

**INGREDIENTS**

Water (Aqua), Cetyl Myristoleate 40% Mixed Cetyl Esters (EHP), Caprylic/Capric Triglyceride, Glycerin, Cetyl Alcohol, Potassium Palmitoyl Hydrolyzed Wheat Protein, Glyceryl Stearate, Cetearyl Alcohol, Aloe Barbadensis Leaf Juice, Mentha Piperita (Peppermint) Oil, Menthol, Camellia Sinensis Leaf Extract, Rosmarinus Officinalis (Rosemary) Leaf Extract, Boswellia Serrata Extract, Xanthan Gum, Chlorphenesin, Potassium Sorbate, Citric Acid (for pH adjustment).
