

Nikken's CM Formula/Joint Product is 96% Effective

DOUBLE BLIND STUDY RESULTS ON NIKKEN'S JOINT SUPPORT PRODUCT

The double blind test results synopsis as reported by Dr. Patrick Millsap and Dr. Freiland of Imaginetics states the following: *"The joint product is effective on over 96% of the people who take it for stiff, aching and sore joints."*

CLINIAL TRIAL SUMMARY:

A randomized double blind placebo study on 93 sufferers of osteo-arthritis was conducted on people who have been diagnosed with OA for an average of 6 years.

The Test Group

52 men and 41 women aged 37-77.

THEY HAD A TOTAL OF 153 AFFECTED JOINTS

- o 139 had painful swelling.
- o 100 had stiffness associated with degrees of deformity.
- o 25 included some soft tissue involvement.

Clinical assessments were conducted in 3 visits over a 60-day period –

The Duration of the Test

A 60 day treatment period with Cetyl Meristolate (CMC) which is the major active ingredient in Nikken's "Joint/CM Formula" product.

The Test Conditions

- o Half of the population got the CM complex (6 CMC capsules per day)
- o Half got the placebo (6 vegetable oil capsules per day the capsules were indistinguishable)

THERE WERE THREE MAJOR AREAS OF INVESTIGATION

1. Pain
2. Range of motion
3. Physical activity indicators

Range of motion (physician assessment):

Participants lay face down and flex leg to determine maximum angle of flexion.

Questionnaires were completed at each visit to determine relative improvement in reduction of pain. - Lequesne indices baseline was used.

Range of Motion Results:

Note the higher the number the greater the range of motion.

Day 0:	Day 30:	Day 60:
CMC - 86 degrees degrees	CMC - 93 degrees	CMC - 96
Placebo - 82 degrees - 83 degrees	Placebo - 84 degrees	Placebo

WALKING CAPABILITIES:

Maximum distance you can walk in 15 minutes.

Day 0:	Day 60:
CMC - 700 feet	CMC - 2300 feet
Placebo - 700 feet	Placebo - 700 feet

Walking Upstairs –

CMC - 35% improvement
Placebo - 12% improvement

Walking Downstairs –

CMC - 43% improvement

Placebo – 11% improvement

KNEE BENDING:

CMC users experienced more than a 2-fold improvement

Day 30

Day 60 –

CMC - 17% improvement

CMC - 23% improvement

Placebo - 7% improvement

Placebo - 12% improvement

"These results will be published in a peer-reviewed journal later this year." "It has just been completed. We had to make a decision as to whether we should share this with the distributors at the convention or wait until it could be published. We chose to share the information with you now." "However, it will take time to get it into the medical journals."

Just know that Nikken's CM Formula/Joint product is 96% effective.

Please share this information, we all know someone who lives with the discomfort of sore, stiff and "quality of life limiting" joints.

NIKKEN has just released this study,..... use it in good health.
