I was electrocuted in October 1996 through my right hand. Due to the severity of the electrocution, I developed RSD/CRPS//TOS in my hand and throughout my shoulder as well as asthma from my childhood. I tried copious amounts of medication and treatment plans as suggested by a variety of doctors. I used to get a nerve block (very painful injections) four to five of them every week just for short term relief. I used to take around 29 pills a day; I was dependant on Oxicontine (narcotic medication) which ultimately had lots of bad side effects. While I was on these narcotics and other multiple medications including antidepressants, they did nothing to improve my symptoms or my condition. I suffered a great deal; at one point I considered suicide. But then I realized that my loved ones would suffer a greater loss. For my childhood asthma I was dependant on a bunch of inhalers (some steroids) and nebulizer a couple of times a day and during the night. I was led to Nikken products by wellness consultant Dawn Tamaribuchi and my whole life very dramatically changed. I was encouraged by my both my treating physicians, Dr. Bhandari and Dr. Dhillon, to try the products and the result was very shocking for me. I have cut down my intake of medication by 95%. Even my cholesterol dropped from 287 to 174 without any cholesterol drugs which I stopped taking since January 2005. No more nebulizer or any kind of inhalers and no more nerve blocks and no more narcotic pain pills. It was beyond their expectation so they both paid very close attention to Nikken products and decided to join Nikken as Wellness Consultants to help their patients. The best part of whole Nikken story, not only did it give me a new life, but it gave me a very wonderful wife because I ended up getting married to Dawn and now together we help others to make a difference in their life.
